profile/
personal summary/
career statement * Having participated in design and completion at different scales of Residential (private & affordable), Education, Work, Cultural and Public projects for several years gives me a broad understanding of spatial design applied to a diverse range of programme requirements

* Working along all the stages from conception to delivery on site provides me with a deep knowledge of the building environment regarding: RIBA stages, management procedures, construction systems & technologies, materials & specifications, regulations & codes (local, national and international) and sustainable development

* Experience in large projects has allowed me to develop the confidence & resilience necessary within long complex processes involving: quick & effective yet thorough & quality response, team-working capability, organisational, management & communication skills, and ability to liaise with an heterogeneous map of partners: clients, consultants & contractors
